New Magica Rust Blocker Now Available

Oshkosh, WI – Magica Inc. is pleased to announce the availability of their newest product, Magica Rust Blocker. This new product will complement the existing product line of Magica Rust Remover spray and gel.

“For the past year, we have been testing our new Magica Rust Blocker, and are finally satisfied and ready to launch this new product”, said Bob Everhard, national sales manager at Magica Inc.

“While our Magica Rust Remover spray and gel are very effective at removing rust stains on most surfaces; we wanted to make a product specifically for ferrous metal surfaces”, explained Bob.

Not only does Magica Rust Blocker eliminate rust on all types of ferrous metal equipment, but the unique rust blocker seals out the moisture that can cause future corrosion. It’s not a paint, but rather a “metal treatment” that keeps rust from coming back.

How Does Magica Rust Blocker work? This latex-like rust polymer chemically converts rust into a black protective coating. The product color will change from off-white to a dark blue to black, indicating that the chemical conversion is taking place. It may also be painted a different color once the rust blocker has dried.

Magica Rust Blocker has hundreds of household and commercial uses for preventing rust from re-occurring:

Antiques

Autos & RV’s

Boat Trailers

Cast Iron

Fences & Gates

Farm Equipment

Sheet Metal

Iron Railings

Lawn Equipment

Metal Tanks

Patio Furniture

Metal Tanks

Magica Rust Blocker is available in three convenient sizes: 8 oz. bottle, 32 oz. bottle or gallon size to tackle larger projects.
